Environmental Policy Statement

Cablepoint Ltd will in all of its activities and undertakings commit to uphold the standards required to comply with **BS EN ISO14001:2004 Standard** requirements. This commitment will be cascaded from Top Management to all Staff, Suppliers and Customers where required.

The Company will also uphold all statutory requirements including all relevant Environmental regulations and requirements, all approved codes of practices, and all corporate policies that the company requires under its work activities and undertakings.

It is the Company's interest to have a planned approach towards prevention and reduction of waste and pollution leading to a long term reduction of costs, as prevention and reduction are more desirable and economical than damage repair after the event.

The Company will control its activities to avoid causing unnecessary and unacceptable risks or adverse effects on the environment in line with the requirements of the **Environment Protection Act 1990**, as far as is reasonably practicable. Responsibility for the environment is ranked equally with other aspects of the company's undertakings including Health & Safety, and Quality management, environmental issues will be run in conjunction with these and will be implemented to the same standards.

Environmental awareness and individual responsibility will be developed amongst employees at all levels with full and effective consultation being encouraged.

The Company will continue to develop and improve standards by making use of available technology and developments, together with a waste recovery and recycling approach.

Local community interests will be taken into account and positive communication with the community entered into where appropriate.

Clients, employees, the general public and all other persons who may be affected will be made aware of any company activity which may affect the local or global environment.

Natural habitats and wildlife will be respected and where appropriate within the control of the company, maintenance, restoration or creation of habitats will be encouraged.

Materials will be sourced from suppliers with a positive approach to sustainability and recycling of items and materials.

Vehicles will be maintained in accordance with the manufacturer's guidelines to ensure optimal performance and minimise any pollutants released into the atmosphere. The minimisation of the amount of vehicles will be encouraged where possible.

Environmental Policy

Where possible, when purchasing any new vehicles, apart from cost, other factors will be taken into consideration: i.e. Vehicle emissions, weight and size, number of seats, load capacity – all of these factors will be determined to ensure that the correct type of vehicle is purchased, to ensure the impact on the environment is minimized, including:

- Emissions into the atmosphere
- Number of seats – to minimise journeys
- Weight and size – to ensure load capacity is adequate and minimise journeys.

Energy usage will be kept to a minimum on site during standard working practices etc.

Delivery of materials will be constantly monitored and stock levels kept at a level to minimise the amount of deliveries taken, therefore reducing the amount of delivery vehicles on the road specifically for Cablepoint Ltd deliveries.

The company will endeavour to minimise the amount of waste taken to general landfill, and will actively promote the re-use and re-cycling of packaging and other materials.

This Environmental Policy and all associated documents will be revised annually or when required due to changes in any regulations etc., or upon implementation of any significant changes to the Company's activities etc.

This Policy and all associated **BS EN ISO14001:2004 Standard** documentation will be made available for employees, clients, and any other interested parties. A copy of the policy has been posted on the company website as a general declaration that Cablepoint Ltd is serious about protecting the environment.
